PROJECTS

Memories App

[Link to Code](#)

Developed and deployed a professional MERN (MongoDB, Express.js, React, Node.js) stack web app with Redux for state management. Enables seamless user interaction, supporting CRUD operations on memories and user authentication using the google OAuth package and normal signup and login.

Smart-brains

[Link to Code](#)

Created a webpage using React.js, Node.js, Express.js, and PostgreSQL. The app can detect a face in any image and store the total number of face detections done by a particular user in the database.

Robofriends

[Link to Code](#)

Designed a webpage using basic React.js. Showcases the contact information of people with unique profile icons and includes a search user feature.

Portfolio Website

[Link to Code](#)

Developed a responsive portfolio website using ReactJS and Tailwind CSS. The site showcases my projects and skills with a modern, user-friendly design, ensuring accessibility across various devices and screen sizes.

Bus booking system

[Link to Code](#)

Built using C++ and concepts of object-oriented programming, such as inheritance, error handling, and file-handling.

TicTacToe game

[Link to Code](#)

Created a TicTacToe game webpage using HTML, CSS, and JavaScript.

Grocery management tool

[Link to Code](#)

Developed using C.
